Only those products bearing the UL Certification Mark should be considered as being covered by UL's  
Certification and Follow-Up Service.

Recognized components are incomplete in certain constructional features or restricted in  
performance capabilities and are intended for use as components of complete equipment  
submitted for investigation rather than for direct separate installation in the field. The final  
acceptance of the component is dependent upon its installation and use in complete equipment  
submitted to UL LLC.

Look for the UL Certification Mark on the product.

This is to certify that representative samples of the product as specified on this certificate were tested  
according to the current UL requirements.
